## Downloading Videos From The Solar Camera Using The PC Software

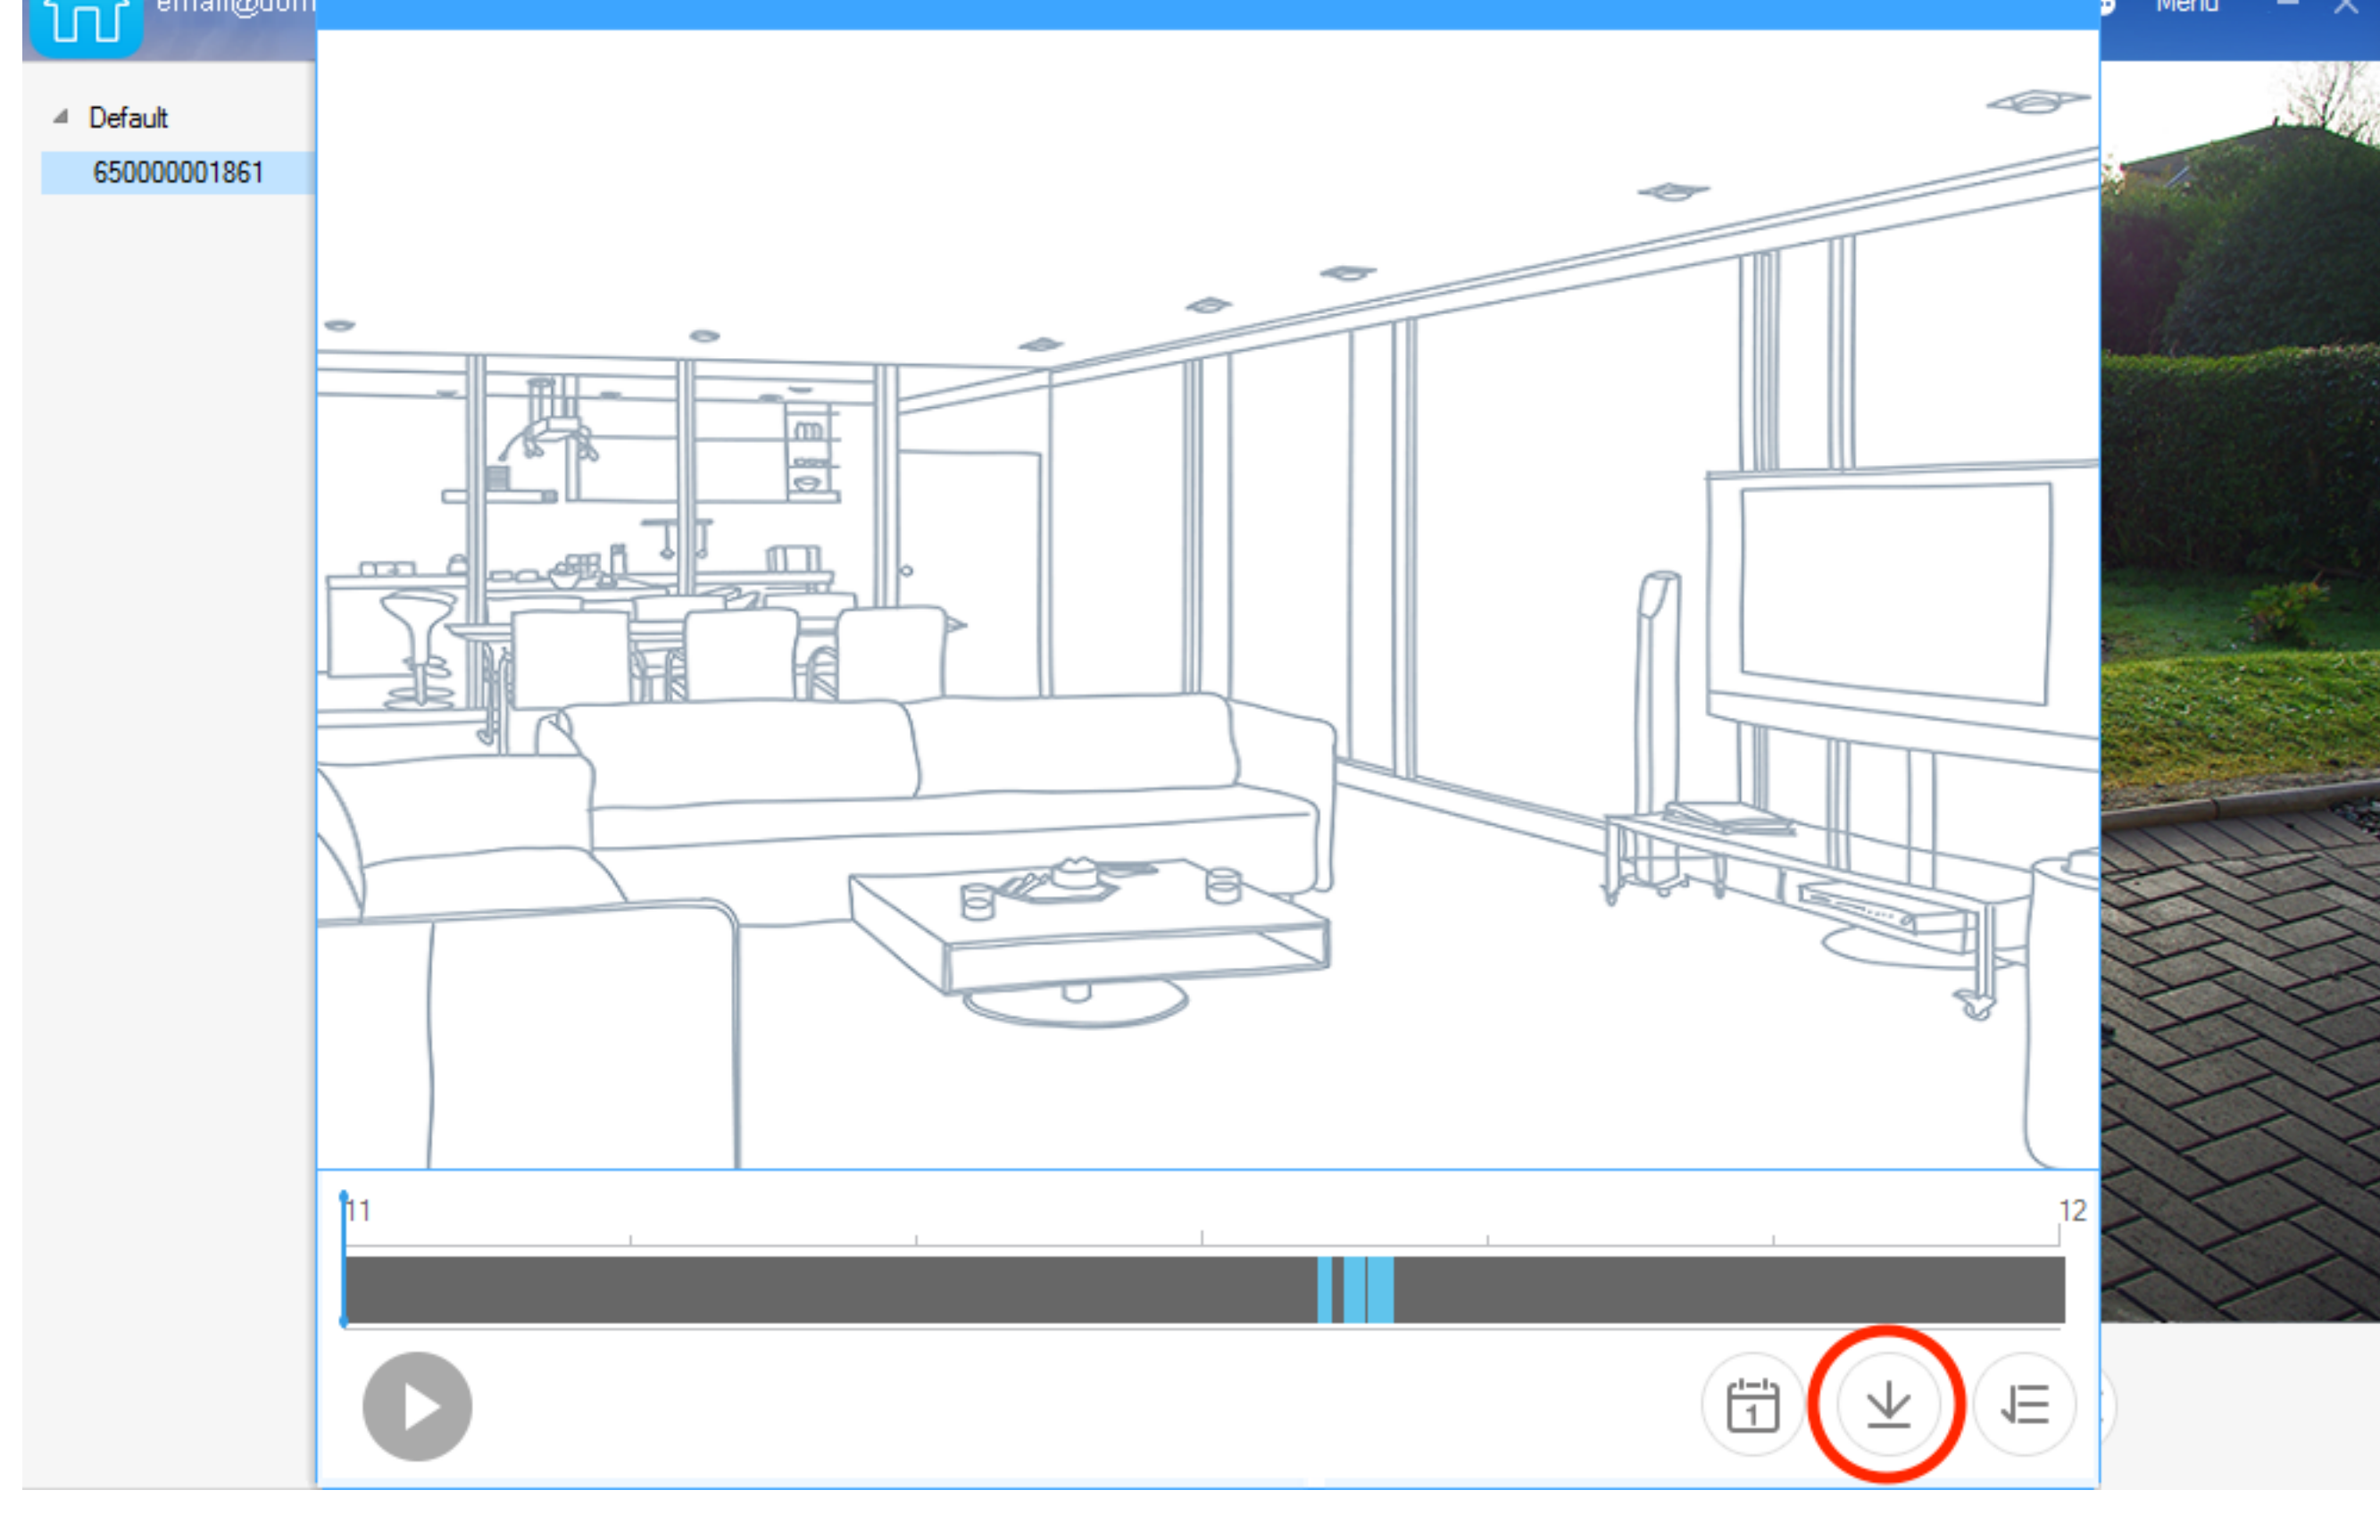

**1. Download the PC Software** form **www.lxory.com/scs**. Launch the software and log in with the credentials you created in your mobile App.

**Note:** The user account must be created in the mobile App and can not be created in the PC software.

**2. Click the 'History' button** (the symbol that looks like a clock).

**3. On the 'History' screen, click the 'Download' button.**

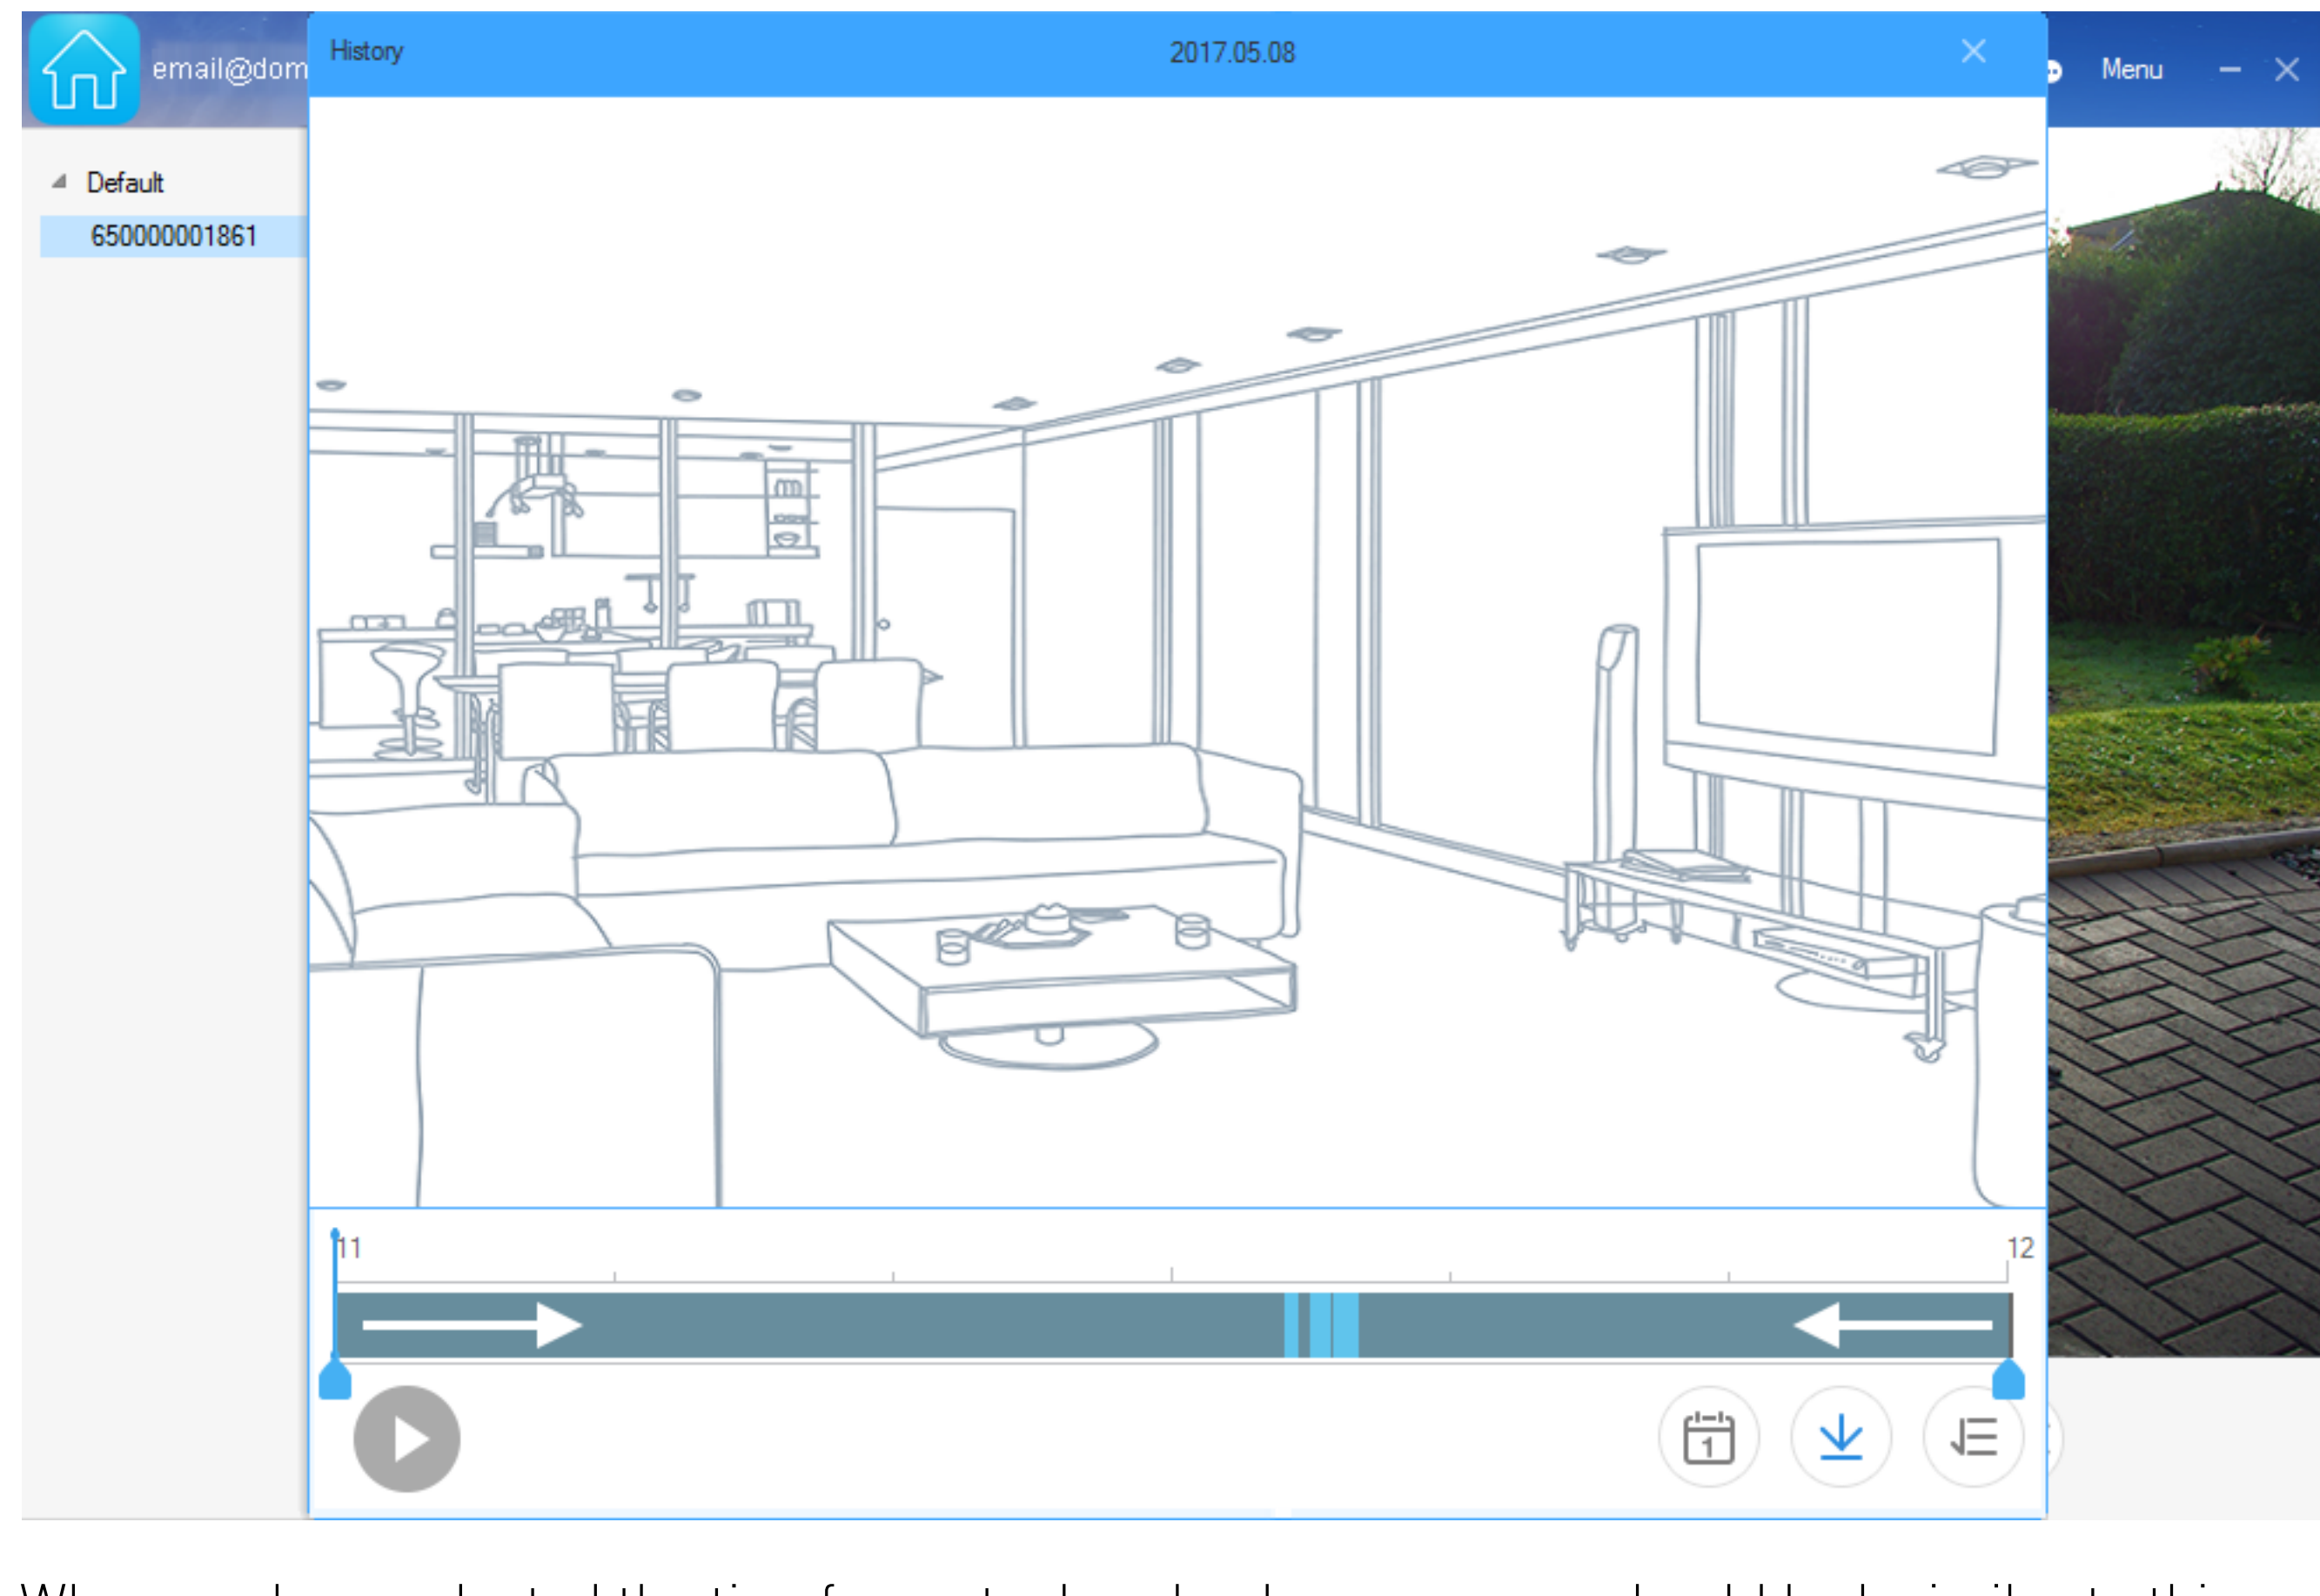

**4. On the 'Download' screen, select the timeframe.**

Use the 'Calendar' button to select the date of the recordings you want to download.

**Optional:** Use the timeframe markers left and right of the timeline to further narrow down the time of the videos you want to download. Click and drag the markers.

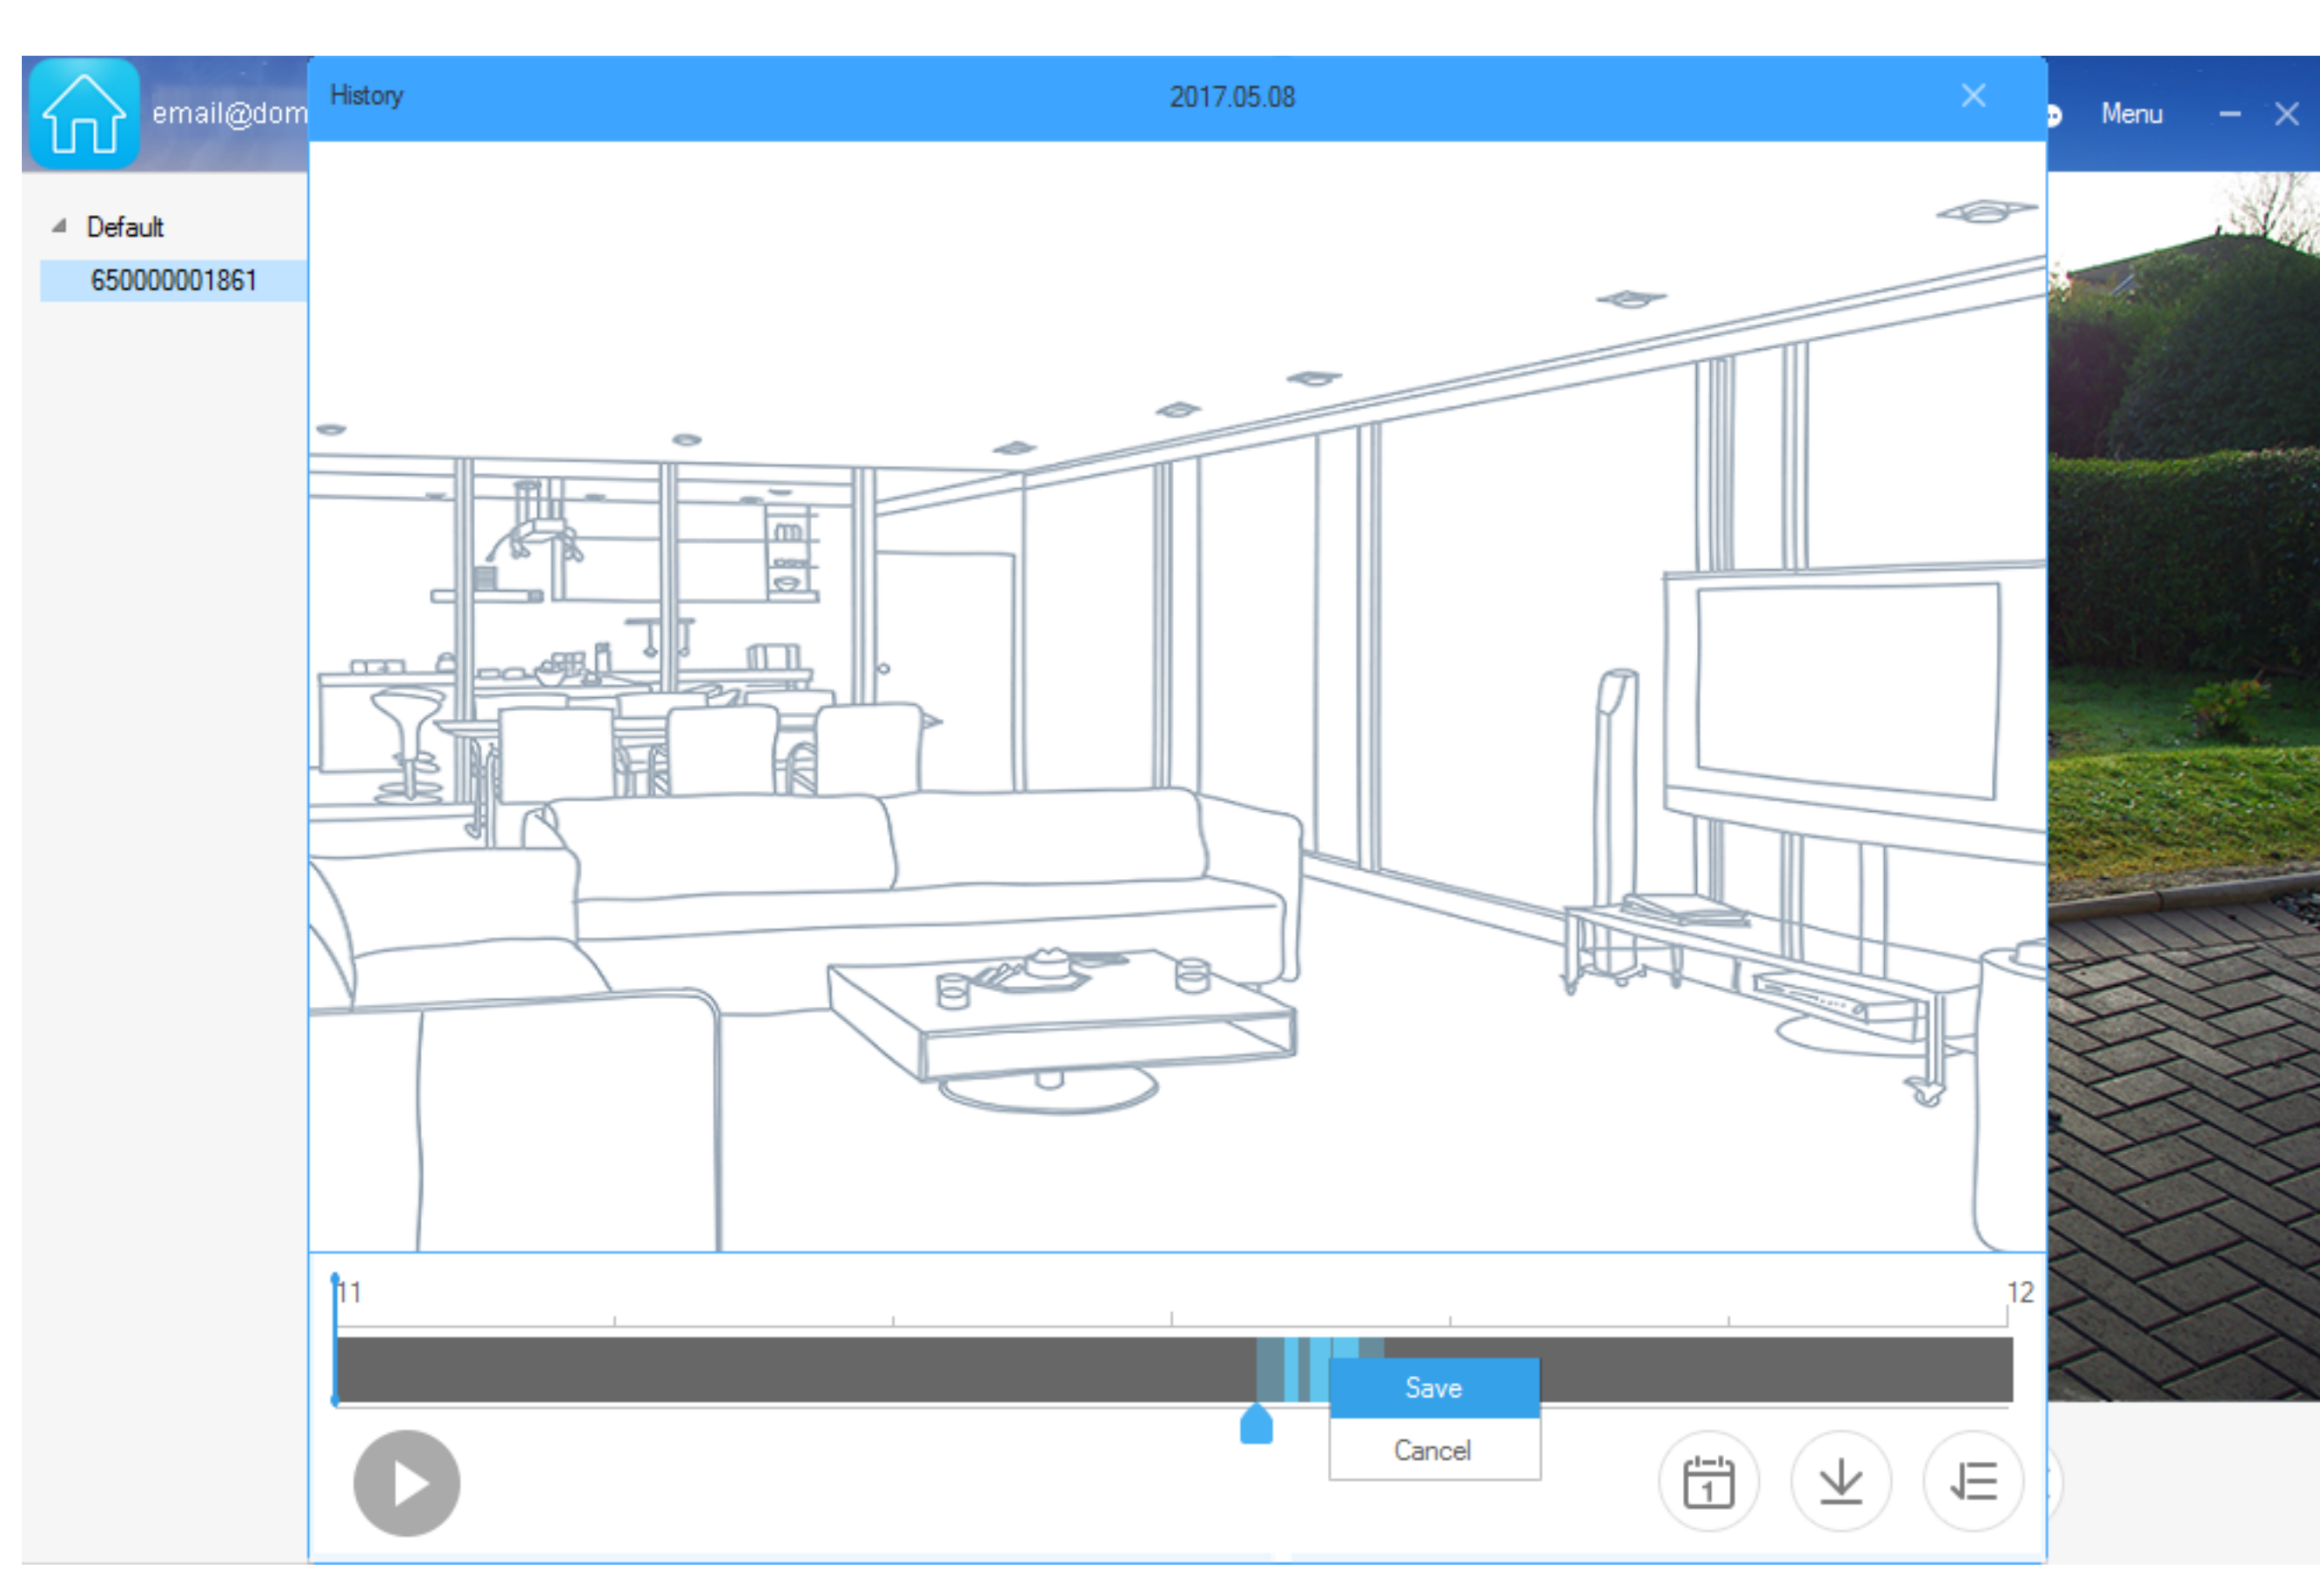

**Note:** The blue vertical lines represent recordings. Make sure there are recordings available for download in your selected timeframe.

When you have selected the timeframe to download, your screen should look similar to this:

**5. Right-Click on the selected timeframe and click 'Save'.**

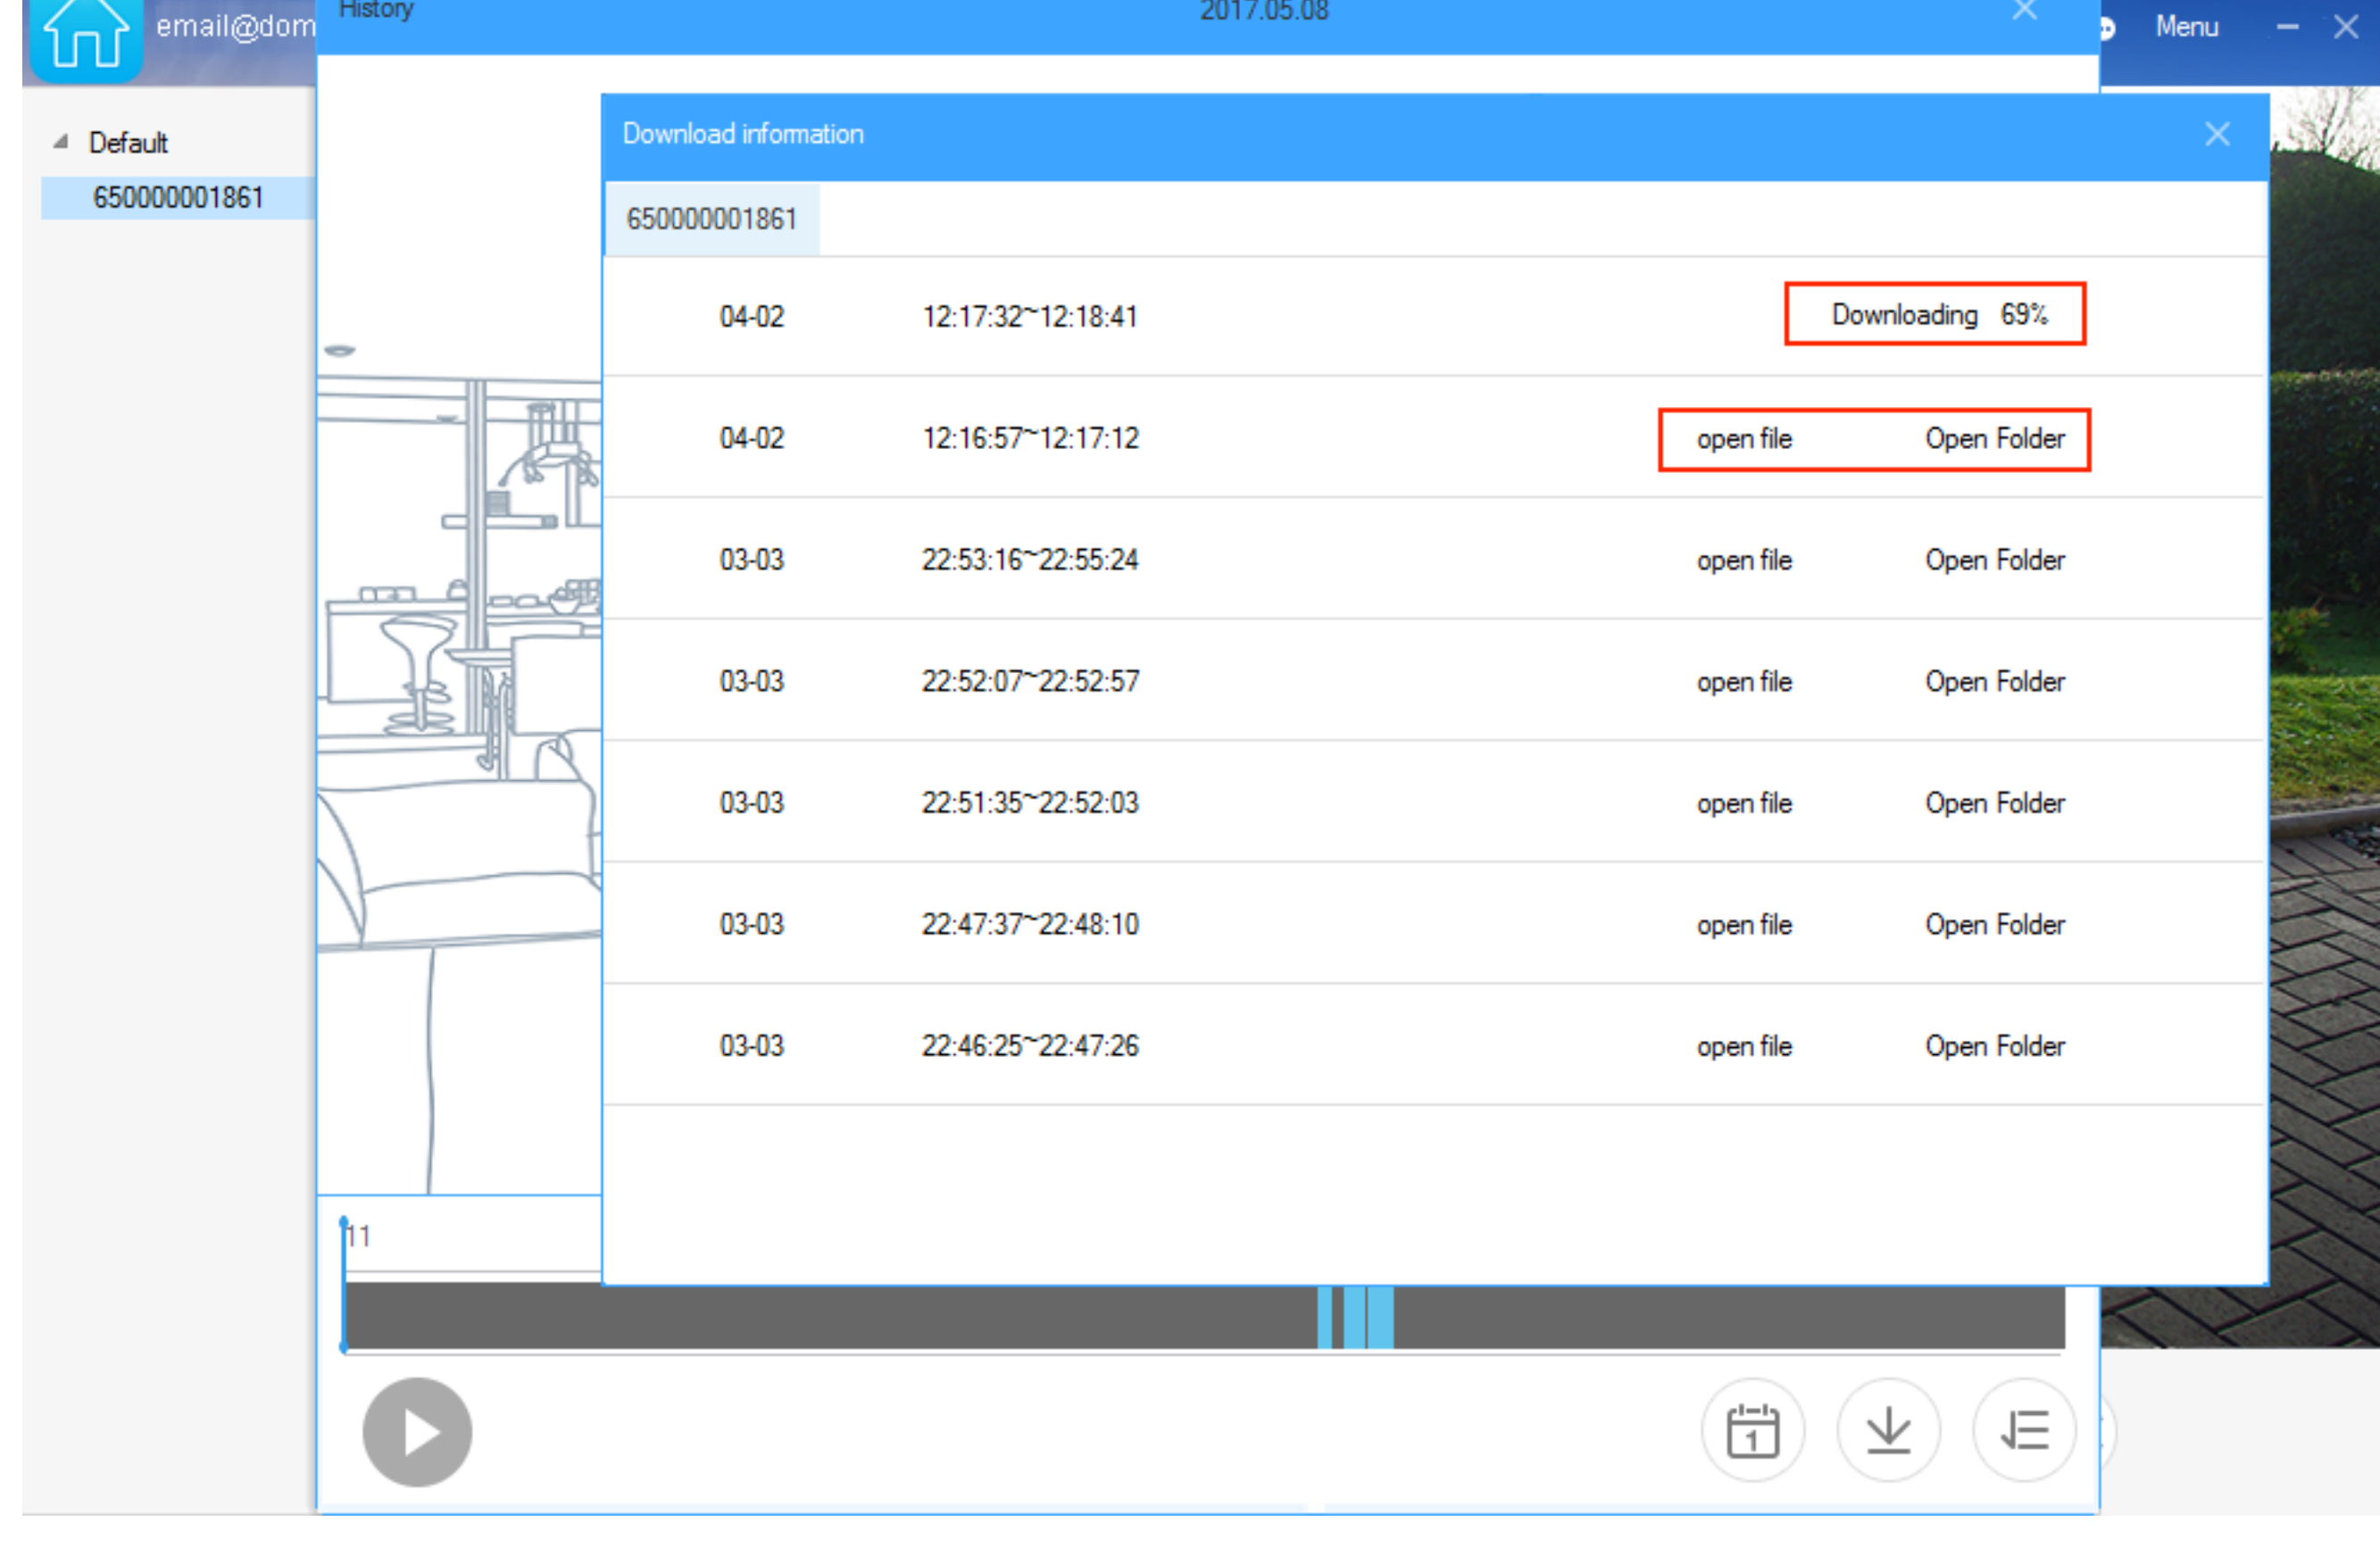

A red dot appears next to the 'download list' button.

**6. Click the 'download list' button.**

You can see the download process of the video you selected. When download is complete, you will see a 'open file' and a 'Open Folder' link next to the video.

**7. Click the 'open file' link to view the video using your default video player.**

Click the 'Open Folder' button to see the list of all downloaded videos.
